## Surface Preparation \_

Application surfaces should be dry.

The surfaces should be clean, firm and sturdy, bearing and free of any free particles.

The surface should be cleaned of all residual materials such as oil, grease, dirt, paint, cement grout, rust, mold oil, salt efflorescence and other foreign substances which might reduce the adherence.

It is recommended to use bitumen based primer for application on absorbent surfaces such as concrete, plaster and chipboard.

# Application Information .

The peelable film layer on one side of the tape is peeled off and the film is pressed firmly on the application surface. The tape should be pressed so that it makes full contact with the application surface at every point.

## **Shelf Life**

The shelf life of the product is 12 months when it is stored on wooden pallets in a cool, dry and moisture free environment with an ambient temperature between +5°C and +30°C

#### Safety Precautions \_

No smoking should take place during application.

After the application, protect the application surface from heavy traffic for the next 24 hours.

Avoid application where there is frost or there is a risk of frost.

The operator should be wearing proper work attire, goggles, mask and protective gloves appropriate to work and worker safety regulations.
